Application Instruction for Crystal Mesh Standard Mini

Crystal Mesh Standard Mini is suitable for use in a wide range of segments such as textiles and accessories.

The hotfix version can be applied using heat, the transfer foil must not be removed before the hotfix application. The temperature can be applied from the front or the back.

The No hotfix version can be hand or machine sewn.

Sewing: Care must be taken during sewing application to apply little pressure with the sewing foot.

Care Instruction for Crystal Mesh Standard Mini

					
Turn inside out and use mild laundry detergent.	Do not use chlorine bleach!	Do not tumble dry!	Do not iron!	The textile can be gently drycleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet cleaning. Turn inside out.
Wash by hand: max. temperature 30 °C (86 °F), very mild process.			To protect the crystals as much as possible, the use of a soft wash bag is recommended.		

Find more detailed information on above mentioned application methods and care instructions in the Application Manual on SIA.

Application Instruction for Cupchains

Focus segments: Jewelry, Accessories, Textile.

Application: The Cupchains can be soldered or sewn by hand. Please note that the product needs to be plated before final application by sewing. The single row cupchains can also be ordered electroplated

- Soldering: soldering can be used to combine the Cupchains with other metal components. Please find more detailed information about the soldering process within our application manual.
- Sewing: sewing is to be done manually. Machine sewing is not recommended for Cupchains.

Care Instruction for Cupchains

Turn inside out and use mild laundry detergent.

Do not use chlorine bleach!

Do not tumble dry!

Do not iron!

The textile may not be dry-cleaned.

Wash by hand: max. temperature 30 °C (86 °F), very mild process.

Find more detailed information on above mentioned application methods and care instructions in the Application Manual on SIA.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose or chip. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose, in particular to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any tableware surface likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible for complying with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible for complying with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are proper applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.

Change of Product

Swarovski reserves the right to modify the dimensions, shape, composition and concentration of components belonging to products that are referred to in this Product Information brochure. Furthermore, any applicable laws and regulations mentioned are subject to change, which is why Swarovski regularly publishes an updated version of the Product Information brochure containing facts, (application) instructions, and the current legal situation that is valid at the time of publication. References to compliance with such regulations as are stated above are based on their requirements as of the current date. Anyone seeking an in-depth understanding of the provisions should read the various laws in their entirety and/or seek advice from a legal counsel. The customer must request and observe the valid version of the Product Information brochure before (re)ordering and using the products.

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

X-Cut
Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

Hotfix Glue
The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

Platinum* Pro
With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

Crystals – Made in Austria
The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

Design Service
Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry’s best creative talent.

Global Service
Swarovski’s Global Service Network provides customers with dedicated personal assistance on a local level.

Application Service
A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

Customized Service
Choose new variations by going beyond Swarovski’s tremendous standard assortment of crystal components and forward integrated elements.

COMPLIANCE, WITH INTEGRITY

Advanced Crystal
Swarovski’s patented lead-free** formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

Clear
Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski’s products.

OEKO-TEX
Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

Compliance Service
Assessments regarding substance limitations as well as compliance information and advice to support customers in complying with relevant laws, regulations, and voluntary standards.

* Silver mirror coated with a platinum-colored protective layer. ** Crystal glass and all other materials containing 0.004% lead or less.
